PERSONAL INFO

DOB: 24 Feb 1998
Sex: Male
Status: Single
Nationality: Ethiopian
Languages: Amharic, English

TECH SKILLS

HTML5 & CSS3
JavaScript (ES6+)
React
Tailwind CSS & Bootstrap
Three.js & GSAP
Full-Stack Web Dev.
REST API Design
Git / GitHub
Cursor AI
Agentic Workflows
AI & LLM Integration
Prompt Engineering
MongoDB & Vector Search
Python (Essentials)
Android Development
Software Installation
System Maintenance
Technical Support

ABOUT

Motivated Front-End Web Developer and IT Support Specialist who builds clean, modern, high-performance websites and supports clients with software installation, troubleshooting, and system maintenance. Skilled in HTML5, CSS3, JavaScript (ES6+), React, and Tailwind CSS, and experienced in full-stack delivery of production systems. Combines solid core programming skills with AI-accelerated workflows (Cursor AI, prompt engineering, agentic workflows) to ship reliable, responsive, pixel-perfect work faster. Holds 52 verified credentials from Cisco, IBM, Meta, Johns Hopkins University, O'Reilly, MongoDB, Coursera, Udacity, and Udemy.

PROFESSIONAL EXPERIENCE

Website Developer

Amare Software Design and Development

- Developed and maintained functional and responsive websites, ensuring a user-friendly experience.
- Utilized HTML, CSS, JavaScript, and related web technologies to create dynamic and interactive web pages.
- Optimized website performance and conducted regular updates to improve functionality.
- Collaborated with cross-functional teams to ensure seamless design integration and usability.

Freelance Front-End Developer

Upwork & Independent Clients · Remote

- Built clean, responsive, high-performance websites for international clients, combining core web fundamentals with AI-accelerated workflows (Cursor AI, prompt engineering).
- Designed and launched full websites, conversion-focused landing pages, and personal portfolios.
- Engineered fully responsive layouts across mobile, tablet, and desktop using modern CSS (Flexbox, Grid).
- Resolved layout defects, debugged front-end state, and optimized Core Web Vitals.

Stack: HTML5 / CSS3 · JavaScript (ES6+) · React · Tailwind CSS · Cursor AI

Web Developer

Contract

Habiye Academy · Addis Ababa, Ethiopia

- Engineered an end-to-end custom student registration and admission management system, streamlining enrollment for students and administrators.
- Architected an intuitive multi-step registration workflow with client-side and server-side validation.
- Created a mobile-first, accessible interface with instant form feedback.
- Maintained production deployment with zero downtime during active enrollment windows.

Stack: PHP · Full-Stack Development · Form Architecture · Responsive UI

Software Supply & Installation Specialist

Ongoing

Freelance / Independent

- Provided comprehensive software supply and installation services for diverse client needs.
- Performed troubleshooting and maintenance of software and system issues.
- Conducted software updates and upgrades to improve performance and security.
- Worked closely with clients to understand requirements and deliver tailored software solutions.

Web Development Intern

Internship

CodeAlpha · Remote

- Completed an intensive virtual web development internship focused on front-end architecture, responsive components, and modern coding standards.
- Developed modular, interactive UI components and web applications using vanilla JavaScript and CSS3.
- Applied Git version control workflows and deployed via GitHub Pages.
- Conducted code reviews, debugged edge cases, and improved rendering speed and user experience.

Stack: Front-End Architecture · Git / GitHub · UI / UX · Performance

PERSONAL PROJECTS

Habiye Academy · School Registration System · Live

habiyeacademy.com

Custom school registration and enrollment platform built from scratch, with a streamlined enrollment flow, accessible form validation, and a maintainable, production-ready codebase covering frontend and backend.

Stack: PHP · Full-Stack · Responsive UI

Dr-Goraw · Interactive Web App

drgorawgoshu.netlify.app/

Responsive, interactive front-end application deployed on GitHub Pages with modular CSS and optimized client performance.

Stack: JavaScript (ES6+) · HTML5 / CSS3

AskDocs · AI & RAG Application

[GitHub repository](#)

Document exploration and question-answering tool powered by vector retrieval and large language model integration.

Stack: Python · Vector Search · AI Workflows

SentimentScope · Text Analytics Tool

[GitHub repository](#)

Interactive text sentiment evaluation platform offering real-time tone extraction and structured visual reporting.

Stack: NLP · Interactive UI · Text Analytics
